Village of Ashwaubenon Completes Post-Election Audit with 100% Matching Results

ASHWAUBENON, Wis. – On November 19, 2026, the Village of Ashwaubenon successfully completed its post-election voting equipment audit for the November 3, 2026, General Election. Village election officials and staff independently hand-counted 587 Central Count ballots cast for Wards 7 & 8 for four contests selected by the Wisconsin Elections Commission (WEC). The final hand-count totals matched the Election Night voting equipment results exactly, confirming 100% agreement with no discrepancies.

The Village of Ashwaubenon was randomly selected by the WEC to participate in the statewide audit. Conducted in a public setting, each ballot was independently reviewed and tallied by two separate auditors for additional verification. The audit examined results from the Village's DS300 optical scan voting equipment for the following contests: Governor/Lieutenant Governor, Attorney General, Representative to the Assembly - District 89, and Brown County Sheriff.

Wisconsin Statute § 7.08(6) requires post-election audits of voting systems following each General Election. Reporting units are randomly selected by the Wisconsin Elections Commission (WEC), and election officials independently hand-count ballots for designated contests to verify the accuracy of voting equipment results. These audits provide an additional safeguard beyond mandatory pre-election equipment testing, with completed audit materials submitted to the WEC for review as part of Wisconsin's statewide election verification process.

The Village of Ashwaubenon extends its sincere appreciation to the election inspectors and village staff who dedicated their time to completing this extensive audit. Their patience, attention to detail, and commitment to accuracy were essential to the successful completion of the audit.
